Senior Front End Developer

Develop interactive, immersive and engaging experiences that live on a variety of devices - desktop web applications, smartphones and tablets.
The role turns a creative concept and executes it within the available technology medium to ensure full delivery of customer requirements.

Role Responsibilities

- Provide leadership and expertise in the development of new products/services/processes, frequently operating at the leading edge of technology
- Work independently for long periods of time adhering to high technical standards
- Give accurate estimates for new projects and features
- Lead projects from a technical and procedural approach
- Deliver best-in-class HTML5 and CSS3 front-end code across a broad array of interactive web and mobile projects
- Employ sound Object Oriented Programming techniques to deliver highly interactive executions of creative content
- Employ test driven development (TDD) on all projects and code produced
- Review and critique code produced by other team members
- Fix bugs and software problems rapidly
- Work with technologies outside of JS/HTML and CSS to achieve the best result for the client
- Use lateral thinking and investigative techniques to solve technological challenges
- Use creative flair to assist with the build and maintenance of a number of different projects
- Taking ownership of website updates and ensuring they are fully up to the Digital Studio standard before going to QA
- Work effectively within an agile, deadline-driven production process to complete web projects with rapid, iterative cycles
- Stay current on the latest trends and emerging technologies within the UX/UI community
- Participate in the ongoing development and implementation of front-end web coding and design standards, writing clear, clean, and concise code
- Participate in discussions with team members about technical best practices and help identify optimal technical solutions
- Train and mentor other members of the team

All Staff Responsibilities

- Carry out any reasonable duties as identified by your Line Manager or Team Leader
- Positively represent Burrows to our customers and suppliers
- Ensure compliance with all contractual employment obligations
- Ensure compliance with our ISO standards
- Fully participate in the company's performance management and development programmes
- Maximise own ability to produce quality work, on time, and to brief, utilising best skills and available technology
- Work in accordance with the company's Human Resources policies and procedures
- Ensure compliance with health and safety requirements

Your Qualities as a Candidate

You're an excellent coder with an Object-Oriented and TDD approach, consistently demonstrating a high quality of technical understanding and enthusiasm for innovation.

You have a constant desire to improve your abilities and you have a can-do approach to problem solving. You're able to prioritise workload and you're a good lateral thinker.

Essential Skills & Knowledge

Personal Attributes
